

# ST BRONAGH'S PRIMARY SCHOOL INTIMATE CARE POLICY

---

It is our intention at St. Bronagh's Primary School to encourage children to develop independence. However, we accept that there will be occasions when help is required. Our Intimate Care Policy has been developed to safeguard children and staff on these occasions. It is one of a number of policies that contribute to our Pastoral Care Policy. The principles outlined apply to everyone involved in the intimate care of children in our school.

Children are generally more vulnerable than adults, and staff involved with any aspect of pastoral care need to be sensitive to their individual needs.

## Definition

Intimate care may be defined as any activity that is required to meet the personal needs of an individual child on a regular basis, or during a one-off incident. Such activities can include:

- > Washing;
- > Changing clothes;
- > Toileting;
- > First aid and medical assistance;
- > Supervision of a child involved in intimate self-care.

Parents/guardians have a responsibility to advise the school of any known intimate care needs relating to their child and the staff has a responsibility to work in partnership with the children and parents/guardians to meet those needs.

## Principles of Intimate Care

The following are the fundamental principles of intimate care upon which our Policy and Guidelines are based:

- › Every child has the right to be safe;
- › Every child has the right to personal privacy;
- › Every child has the right to be valued as an individual;
- › Every child has the right to be treated with dignity and respect;
- › Each child has the right to be involved and consulted in their own intimate care to the best of their abilities;
- › Each child has the right to express their views on their own intimate care and to have such views taken into account;
- › Every child has the right to have levels of intimate care that are appropriate and consistent as possible.

## School Responsibilities

All members of staff working with children are vetted. This includes students on work placement and volunteers. Only those members of staff who are familiar with the Intimate Care Policy and other Pastoral Care Policies of the school are involved in the intimate care of children and only permanent members of staff will administer intimate care procedures.

Intimate care arrangements are agreed between the school and parents/guardians and, if appropriate, by the child. Consent forms are signed by the parent/guardian and stored in the child's folder.

Only in an emergency would staff undertake any aspect of intimate care that has not been agreed between the parents/guardians and the school. Parents/guardians would then be contacted immediately.

If a staff member has concerns about a colleague's intimate care practice he or she must report this to the Designated or Deputy Designated Teacher for Child Protection.

## Guidelines For Good Practice

All children have the right to be safe and to be treated with dignity and respect. These guidelines are designed to safeguard children and staff. They apply to every member of staff involved with the intimate care of children.

Young children and children with special educational needs can be especially vulnerable. Staff involved with their intimate care need to be particularly sensitive to their individual needs.

It is important to bear in mind that some forms of assistance can be open to misinterpretation. Adhering to the following guidelines of good practice should safeguard children and staff.

### **Involve the child in the intimate care**

Try to encourage a child's independence as far as possible in his or her intimate care. Where a situation renders a child fully dependent, talk about what is going to happen and give choices where possible.

Check your practice by asking the child or parent/guardian about any preferences about carrying out the intimate care.

### **Treat every child with dignity and respect and ensure privacy appropriate to the child's age and situation.**

Where possible intimate care should not be carried out by a member of staff working alone with a child.

### **Make sure practice in intimate care is consistent.**

As a child may have multiple carers a consistent approach to care is essential. Effective communication between all parties ensures that practice is consistent.

### **Be aware of your own limitations.**

Only carry out activities you understand and feel competent with. If in doubt, ASK. Non permanent members of staff should not apply intimate care procedures. They should refer a situation to a permanent member of staff.

### **Promote positive self-esteem and body image.**

Confident, self-assured children who feel their body belongs to them are less vulnerable to sexual abuse.

The approach taken to intimate care can convey lots of messages to a child about their body worth. Attitude to a child's intimate care is important. Keeping in mind the child's age, routine care can be both efficient and relaxed.

### **If you have any concerns you must report them.**

If you observe any unusual markings, discolouration or swellings report it immediately to the Designated or Deputy Designated Teacher for Child Protection.

If a child is accidentally hurt during the intimate care or misunderstands or misinterprets something, reassure the child, ensure their safety and report the incident immediately to the Designated or Deputy Designated Teacher.

Report and record any unusual emotional or behavioural response by the child and follow the procedures as set out in the Child Protection Policy.

## Working With Children Of The Opposite Sex

There is positive value in both male and female staff being involved with children. Ideally, every child should have the choice of carer for their intimate care but the current ratio of female to male staff means that assistance will more often be given by a woman.

The intimate care of boys and girls can be carried out by a member of staff of the opposite sex with the following provisions:

- › When intimate care is being carried out, all children have the right to dignity and privacy, i.e. they should be appropriately covered, the door closed or screens/curtains put in place;
- › If the child appears distressed or uncomfortable when personal tasks are being carried out, the care should stop immediately. Try to ascertain why the child is distressed and provide reassurance;
- › Report any concerns to the Designated or Deputy Designated Teacher for Child Protection and make a written record;
- › Parents/guardians must be informed about any concerns.

## Communication With Children

It is the responsibility of all staff caring for a child to ensure that they are aware of the child's method and level of communication.

To ensure effective communication:

- › Make eye contact at the child's level;
- › Use simple language and repeat if necessary;
- › Wait for response;
- › Continue to explain to the child what is happening even if there is no response; and
- › Treat the child as an individual with dignity and respect.

## Review Date: Autumn 2016
